

What's Happening Wednesday

Kansas Immunization Program

VFC Consultant On-Call

The Consultant for August 28 thru September 8th is Becky Prall (Becky.Prall@ks.gov) and she can be reached by calling 785-296-5592. The Consultant for September 11th thru 22nd is Jayme Lewis at (Jayme.Lewis@ks.gov) or by calling 785-296-5592.

September 6, 2017

Chief Chat— We have begun shipment of the 2017 – 2018 seasonal influenza vaccine to Kansas Vaccines for Children (VFC) providers and it will begin arriving in your offices this week. As a reminder, vaccine is being shipped proportionally according to what each provider has requested and the amount of vaccine we received in the warehouse for distribution. All vaccine is expected to be shipped by the end of October with most of it shipped by the end of September. We are making every effort to ship the exact vaccine presentation requested by each provider, but we may have to make some substitutions as we reach the end of the shipments as our allocations from CDC do not match perfectly with what has been requested.

With the exception of a small amount of single-dose vials ordered by a few providers, all public supplied seasonal influenza vaccine this year in Kansas is single dose syringes. This will allow for fewer administration errors. We remind you that all single dose syringes are to be used as a single full dose vaccination for the appropriate age. In other words, half of a 0.5 ml syringe should not be administered to a child age 6 – 35 months. The chart below is provided as a quick reference for proper selection of vaccine to be administered according to the age of the patient. Note that this chart only represents the presentations of public supply that are being shipped in Kansas this flu season.

Manufacturer	Presentation	6 months - 35 months	36 months and older
GSK	Fluarix	not indicated	0.5 ml
GSK	Flulaval	0.5 ml	0.5 ml
Sanofi Pasteur	Fluzone	0.25 ml	0.5 ml

[The guidance on the Prevention and Control of Seasonal Influenza with Vaccines: Recommendations of the Advisory Committee on Immunization Practices — United States, 2017–18 Influenza Season](#) has been published. In addition, a [background document](#) containing further information related to the 2017-18 recommendations is available on the CDC website.

As announced last week, the Kansas VFC supplied continuous temperature monitoring units will also begin arriving in provider offices this week. All VFC providers received a special alert email last Thursday with detailed instructions and action items for documentation and training. If you missed the email, please visit the new [data logger page of the Kansas Immunization Program \(KIP\) website](#). In addition, the KIP has also mailed a paper copy of the special alert along with refrigerator and freezer labels to each VFC primary contact. Please watch for this to arrive in your office and place the labels on your respective refrigerator(s) and freezer(s) as instructed. If you have any questions, please contact your [Regional Immunization Consultant](#).

Have a great week and thank you for all you do each day to immunize Kansans!

Phil Griffin, Deputy Director, Bureau of Disease Control and Prevention

VFC Question of the Week–

Q: I am looking for a good general review for influenza vaccines. Do you know of any resources I can share with my staff?

A: The CDC has published a document entitled, “Prevention and Control of Seasonal Influenza with Vaccines: Recommendations of the Advisory Committee on Immunization Practices (ACIP) – United States, 2017-18”. This document contains information regarding vaccine administration, age, timing and dosing recommendations, an algorithm to aid in determining if a child needs an additional dose, as well as a guide to specific ages or medical conditions.

DID YOU KNOW?

Did you know that the Kansas Immunization Program has received 30% of our influenza vaccine allocation. This means that providers should expect approximately 30% of their total flu prebook this week.

2017-2018 PUBLIC FLU PRE-BOOK AVAILABLE AS OF 09/06/2017					
Manufacturer	Brand	NDC	Age	Presentation	% Available
GSK	Fluarix Quad (IIV4)	58160-0907-52	36mos+	10 SDS	52%
GSK	FluLaval Quad (IIV4)	19515-0912-52	6mos+	10 SDS	32%
Sanofi	Fluzone Quad (IIV4)	49281-0417-10	36mos+	10 SDV	20%
Sanofi	Fluzone Quad (IIV4)	49281-0417-50	36mos+	10 SDS	34%
Sanofi	Fluzone Quad (IIV4)	49281-0517-25	6-35mos	10 SDS	30%

KANSAS ACADEMY OF
FAMILY PHYSICIANS
CARING FOR KANSANS

Save the Date: October 13, 2017

Despite the healthcare community's best efforts, millions of teens remain under-vaccinated against serious infectious diseases.¹ As part of *Highlight on VACCINATIONS 4 TEENS*, we're hosting a special event for all Kansas Academy of Family Physician members and other interested groups and individuals to encourage us all to do our part in helping see that more teens are protected.

This non-CME educational panel presentation will feature special guests who will share personal stories of how their families were affected by a vaccine-preventable disease. Vaccination champions – healthcare professionals who have supported vaccination education efforts in our own community – will also share their perspective.

Friday, October 13, 2017

2:00 – 3:30 pm

Wichita Marriott Hotel

9100 Corporate Hills Dr. Wichita KS 67207

Registration coming soon!

Aggregate Inventory Training

The Aggregate Inventory Training occurs every Monday from 1p-2p, and the first Friday of every month from 10:30a-11:30a. This call will go over the basics of the On Hand, Reconciliation submission, Vaccine Ordering and Return windows in KSWebIZ for Aggregate Users. Bring questions and examples of issues that your clinic is having with the end of the month reporting. **Please note: this call is for KSWebIZ**

Aggregate (HL-7) Users Only!

Register now for the date that works best for you!

Vaccine Redistribution

Please email any additions or changes to be made on the Vaccine Redistribution lists with subject matter "Redistribution" to kdhe.vaccine@ks.gov or call toll free at 1-877-296-0464 [Vaccine Redistribution information and lists](#).

REMINDERS: Providers may place the excess doses on the KIP Redistribution list if:

- 1) The vaccine has a minimum of 90 days and a maximum of 365 days before the vaccine's expiration date.
 - 2) The ordering provider is responsible for any doses which expire on the redistribution list that have not been accepted for transfer to another VFC provider.
 - 3) Providers accepting vaccine from the redistribution list are responsible for using the doses once they are transferred. KIP encourages providers to accept only doses they can administer before the expiration date.
 - 4) The transferring and receiving provider will document these doses on their monthly reconciliation reports as transferred vaccines.
 - 5) Once vaccine is transferred please contact KIP to let us know so we can adjust the redistribution list by either deleting the line or by reducing the amount of doses.
 - 6) All vaccines must be in full boxes.
 - 7) The KIP Regional Immunization Consultant who is on call must be contacted prior to transferring vaccine.
 - 8) Providers are responsible for keeping KIP notified if there is a change in amount of doses available for redistribution.
 - 9) When placing an order, you may be contacted if the vaccine you are trying to order is on the redistribution list.
 - 10) Varicella and Proquad will not be posted on the VFC or Private Vaccine Redistribution List. Frozen Varivax vaccines are very intolerant to out of range temperatures. To prevent potential vaccine waste the KIP requests that Varivax containing vaccines not be transferred to other providers.
- For questions regarding transporting vaccine call 877-296-0464 to request assistance.
